

# OlsenBlokk «All in one» hauler.

(Sales started in Aug-23, tested since Oct-22)

New generation of net/trap/line hauler. Pulling force 240-500 kg. Quick coupling for attaching a net drum or fish remover/line guide w/hook guide. The hauler has been very well received in the market. Net drum, fish remover or fishing reel is mounted on the hauler within 2 minutes.

Adjustable power/speed in both directions and equipped with a light that can both shine into the sea and onto the deck.

Prices valid from January 2026, are tax-free ex. VAT and ex. freight.

**Standard version EUR 1990.- (for trap/pot and line hauling without fish remover/line steerer)**

The standard version includes the following: Adjustable speed with hauling and reverse, crab bar that is adjustable out/in and up/down, large disc, small disc, capstain, press wheel, adjustable knife for guiding rope out of biggest disc, flat boat stand, converter from 12V-36V, 8.5 m cable and powerful light that can both shine into the sea and onto the deck. Lifting capacity in air from 240 kg on the largest sheave, max speed 64 m/min, up to 400 kg on the smallest sheave and up to 500 kg on the capstain. The speed is at least 20 m/min. more than the other haulers I sell.

**Standard version including netdrum set, EUR 2240.- (for net hauling and trap/pot hauling with press wheel and crab bar, as well as longline hauling without fish remover/line guide)**

**Standard version including fish remover w/hook guide EUR 2130.- (for trap/pot hauling with crab bar, press wheel and knife, i.e. without the netdrum set)**

**OlsenBlokk where everything is included, except fishing reel EUR 2380.-**

**OlsenBlokk where everything is included EUR 2495.- (Incl.: Standard version + netdrum set, Fish remover/line guide w/hook guide and fishing reel w/line guide)**

Extra for changing from flat to angle mount boatstand EUR 36.- (flat boatstand is included in the standard package)

The angle mount is more expensive to make. The boatstands are made of stainless steel and are much stronger than the type I sells for the other haulers. See pictures and measurements on the other side.

Prices if you buy the extra equipment apart from buying it together with the hauler: (You save EUR 213.- by buying everything together with the hauler)

Net drum set EUR 322.- (bought together with the hauler EUR 250) Incl. drum, net guide, cover protection.

Fish remover/line guide with hook guide EUR 215 (purchased together with the hauler EUR 140)

Fishing reel w/line guide EUR 280.- (purchased together with the hauler EUR 215)

Flat boat stand EUR 86.- (included as standard in the package, but for EUR 36.- you can change to an angle mount)

Angle boat stand EUR 122.-

Crab bar w/hanging roller EUR 160.- (included in the standard package)

Press wheel EUR 130.- (included in the standard package)

Technical data, traction and speed:

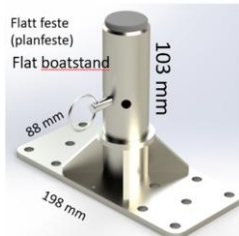

Motor is 650W, 36V, included converter 12V-36V connects to 12V battery. Current consumption 5A-50A depending on load. Adjustable speed in both directions. Max speed 64 m/min on largest disc. That's at least 20 m/min more than the others I sell. Truck power in air from 0-240 Kg on the largest disc, up to 400 kg on the smallest disc and up to 500 kg on the capstan. Weight from 17 kg - 24 kg, depending on the equipment mounted. It has a handle so that it can be easily carried, as shown in the pictures.

The crab bar can be adjusted in 2 positions out/in (long/short), and up/down.

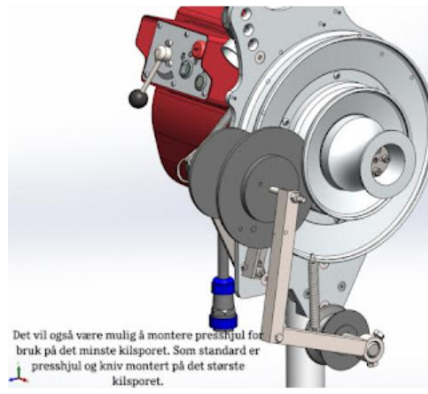

Max load on short 200 kg. When adjusted out to long, max 150 kg. Remember force x arm gives torque!
